

CLAIMS:

1. A storage organizer system comprising a rail adapted to be securely mounted to a substantially flat vertical surface, a storage unit including at least two laterally spaced-apart upright panels having front and rear portions, and at least one rail engaging member mounted to the two laterally spaced-apart upright panels and extending towards the rear, said rail engaging member being adapted to engage the rail for suspending the unit from the rail.

2. A storage organizer system as defined in claim 1, wherein said storage unit engaging portion is adapted to be mounted at selected vertically spaced-apart fixed locations along said at least two spaced-apart upright panels.
3. A storage organizer system as defined in claim 1, wherein said rail engaging portion has a hooked end for engagement at a selected location in said rail.
4. A storage organizer system as defined in claim 1, wherein said rail engaging member includes a transversal member extending across said at least two laterally spaced-apart upright panels, and at least one hook mounted to said transversal member between said at least two laterally spaced-apart upright panels for engagement with said rail.
5. A storage organizer system as defined in claim 4, wherein said transversal member is allowed to rotate about a longitudinal axis thereof relative to said at least two spaced-apart upright panels.

6. A storage organizer system as defined in
claim 5, wherein said transversal member is provided
in the form of a rod received at opposed ends thereof
in first and second circular holes respectively
provided in said at least two laterally spaced-apart
panels.

5
7. A storage organizer system as defined in
claim 3, wherein said at least one rail engaging
member includes a distinct rail engaging member for
each panel, each said distinct rail engaging member
being provided in the form of a bracket adapted to be
secured to a corresponding panel of said at least two
laterally spaced-apart upright panels.

10
15
8. A storage organizer system as defined in
claim 7, wherein said bracket includes a pair of
parallel arms extending from opposed ends of a web
member for receiving said corresponding panel
20 therebetween with said web member covering an
underlying portion of a rear edge of said
corresponding panel, and a hook formation extending
rearwardly from said web member for engaging said
rail.

25
30
9. A storage organizer system as defined in
claim 1, further comprising a spacer extending
rearwardly of said at least two space-apart panels
for cooperating with said at least one rail engaging
member in supporting said at least two laterally
spaced-apart upright panels at a distance from the
vertical surface.

35
10. A storage organizer system as defined in
claim 9, wherein said spacer is provided at a bottom
end portion of said at least two laterally spaced-
apart upright panels.

11. A storage organizer system as defined in
claim 9, wherein said spacer includes a projection
extending rearwardly from a rear edge of each of said
5 at least two laterally spaced-apart panels.

12. A storage organizer system as defined in
claim 1, wherein said rail include first and second
10 legs extending at an acute from each other, said
first legs defining a number of holes adapted to
receive fasteners for horizontally securing said rail
to the vertical surface with said second leg
projecting upwardly.

15 13. A storage organizer system as defined in
claim 12, wherein said rail has a J-shape, whereas
said rail engaging portion has an inverted J-shape.

20 14. A method of mounting a storage organizer
unit on a substantially flat vertical surface,
comprising the steps of: a) mounting a rail on a
substantially flat vertical surface, b) providing a
storage organizer unit and at least one rail engaging
member, c) mounting said at least one rail engaging
25 member to said storage organizer unit, and d)
suspending said storage organizer unit from said rail
by engaging said rail engaging member with said rail.

30 15. A storage organizer system comprising a
rail adapted to be fixed to a vertical surface, a
storage organizer unit for supporting some articles,
a rail engaging member mounted to said storage
organizer unit and projecting rearwardly therefrom
for hanging said storage organizer unit from said
35 rail, and a surface engaging member extending between
said storage organizer unit and the vertical surface
at a distance from said rail engaging member for

cooperating therewith in supporting said storage organizer unit in a substantially vertical position.
